LINK CTR

1.78%

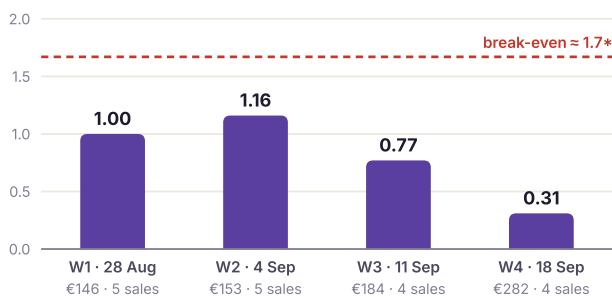

CPM €8.5: attention is cheap

Verdict

The ads get attention: CTR, link CTR and CPM are all healthy. Revenue is lost after the click. Tracking misses most of the journey, nothing brings back warm visitors, a single pack sells for less than it costs to get a sale, and 1 ad took half the budget. **Fix these before adding budget.**

ROAS by week: more spend, fewer sales

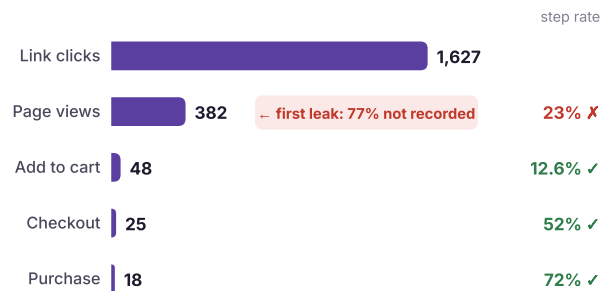

ROAS per week (bars) vs break-even line

Spend went up **+93%** from W1 to W4 while purchases fell **-20%**. Cost per purchase rose from **€29 → €70**. Even the best weeks only broke even on ad spend, before product cost.

Funnel: where the drop happens

All campaigns, 28 Aug – 25 Sep · benchmarks from our Meta playbook

Top of funnel passes: **CTR 2.45%** (≥2% ✓), link CTR is 73% of CTR ✓. Most clicks never show up as a page view. Part of that is real (slow load, accidental taps). Part is tracking (see fix #1). Every step after the page view passes the benchmarks.

Top 3 fixes ranked by impact · estimates assume ~€40/day spend

1 Fix the measurement

CAP1 is live, but it sends only IP, browser and cookie IDs, with no email or phone (match quality **6.1/10**). The browser pixel sees only **~30%** of CAP1 events (Purchase 11 vs 36), likely blocked by CookieYes until consent. Add hashed email, phone and external_id to CAP1.

est. -10-20% CPA · fills retargeting pools

2 Turn on retargeting + refill

0% of budget goes to warm people today. That leaves **~125 abandoned carts** a month, 3k+ IG/FB engagers and 70k+ video plays unused. Put 15-20% of budget on warm, hot and refill ad sets. Buyers of a 30-day pack come back around day 25-40.

est. +8-12 orders / month

3 Sell the Combo, focus the account

A single pack is 2,549-2,799 RSD (≈€23), less than the €43.5 it costs to get a sale. Lead with **Combo Day+Night 4,699 RSD**. Run one always-on prospecting campaign and one test campaign, and stop relaunching.

est. AOV +25-30% · ROAS 0.71 → ~0.9+

30-day fix plan fix in this order

WEEK 1 · PLUMBING

- Consent Mode + email/phone in CAP1
- Confirm margin and set target CPA
- Check that website audiences fill up

WEEK 1 · REBUILD

- 1 prospecting campaign with the best 3-4 ads
- Launch retargeting (warm / hot / refill)
- Exclude buyers from prospecting

WEEK 2-3 · TEST

- Creative test round of 5-6 new concepts
- Rule: turn each ad off at 1,000 impressions
- Landing page test with the Combo offer

WEEK 4 · SCALE

- Move winners into prospecting
- Add +€10/day per step while ROAS holds
- Weekly check: fix the first funnel step that fails

Full findings

Severity: ● CRITICAL ▲ IMPROVE ✓ FINE

SEVERITY	AREA	FINDING (EVIDENCE)	FIX	EST. IMPACT
● CRIT	Tracking	CAPI is live but thin: events carry only IP, browser and cookie IDs, no email or phone (match quality 6.1/10). The browser pixel records ~30% of CAPI events, so page views and website audiences are undercounted.	Add hashed email, phone and external_id to existing CAPI events. Consent Mode on CookieYes. Check event_id dedup.	-10-20% CPA
● CRIT	Economics	Cost per purchase €43.5 vs average order €30.7 . Single packs are ≈€22-24, so the first order never pays back the ad.	Combo (≈€40) as the hero offer. Refill flow. Target CPA from real margin.	AOV +25-30%
● CRIT	Retargeting	No retargeting and no refill. ~125 site cart adds a month end without a purchase, and 3k+ engagers never see an ad again.	Retargeting CBO at 15-20% of budget with 3 ad sets: warm, hot, refill.	+8-12 orders/mo
● CRIT	Structure	4 campaigns in 4 weeks , and 2 ads never delivered. 18 purchases in total vs ~50 a week needed to exit learning. The 2 live campaigns target the same audience with no buyer exclusion, so they bid against each other.	1 always-on prospecting + 1 test campaign. Exclude buyers from the last 30 days. Add new ads to these campaigns instead of relaunching.	steadier CPA
▲ IMPR	Creative	3 ads live. One ad took 50% of spend (ROAS 0.87). The best ad (Night testimonial, €15 CPA, ROAS 2.08) got 8%. 3 statics spent €109 for 0 sales. All 7 videos are the same testimonial style, and most keep only 6-13% of viewers to the 25% mark.	4-6 new ads a week in new formats (see concept sheet). More ads on the Night / late-dinner angle.	biggest long-term lever
▲ IMPR	Placements	Reels take 28% of spend at ROAS 0.34-0.40, vs FB Feed 1.28 and IG Stories 1.22. Audience Network: 278 clicks → 22 page views.	Reels-native cuts: 9:16, sound on, hook in the first second. Keep Audience Network off.	≈ +€250 rev/mo
▲ IMPR	Audience	55+ get 14% of spend but 28% of purchases (ROAS 1.47). Women 55-64 click at a 6% CTR . The sample is small, so treat this as a direction, not proof.	Keep targeting broad. Steer with creative: 45-65 faces, their meals, their problems.	cheaper buyers
▲ IMPR	Landing	Copy sends people to the "GenoMAX site" , a second brand to remember. The homepage loads 47 scripts, and the server took ~1-1.5 s to respond in our test.	Test /easygut/ vs product page vs Combo page. Check mobile PageSpeed.	more page views per click
✓ FINE	Working	Attention and delivery are healthy: CTR 2.45%, CPM €8.5, checkout→purchase 72%. Purchase optimisation with a broad Advantage+ audience is the right setup, and running ads on the existing post keeps its social proof.		

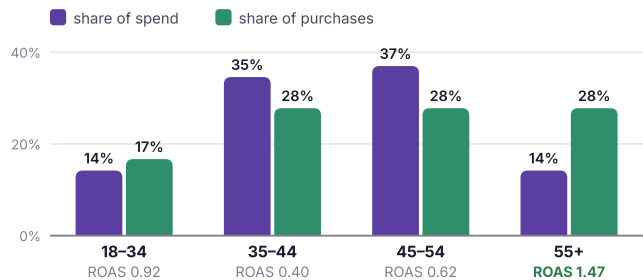

Spend by ad: 1 ad took half the budget

Full history · V = video, S = static · highlighted = ads with signal

Who buys: 55+ convert best

Share of spend vs share of purchases, by age

35-54 get 72% of spend and convert worst. 55+ bring the same number of purchases (5) as each of those bands for less than half the spend.
