YEA PROTEIN · ADS PLAYBOOK · NOV 2026 – MAY 2027

How much to spend, when, and where

Budget rules, landing pages, and the season calendar on page 2.

Fix first Restock Chocolate + Vanilla Caramel · Bring back 2× Combos · Build /posni-protein · Turn on stock tracking · Keep EasyGut's budget separate · Judge by shop revenue, not Meta

What "1×" means: a normal week

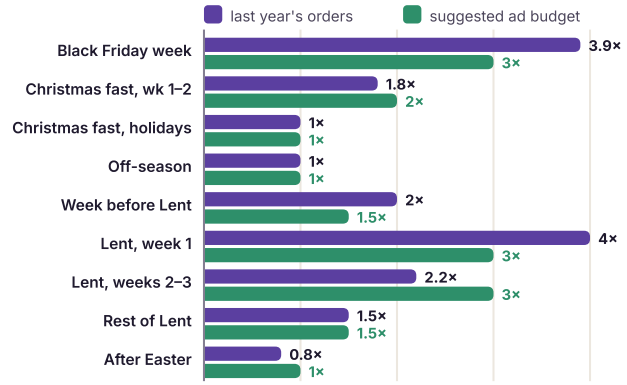

~65	~70–100	~€850
orders a week	units a week (more with Combos)	a week on Meta

That was a **normal off-season week in autumn 2025**, with every flavor in stock. Today it's ~20 orders a week on ~€70, because the ads are nearly off.

Set 1× to the weekly budget your stock can carry for 6+ weeks, and rebuild toward last year's level in +20% steps. Every other level is a multiple of it.

Why spend more in fasts: last year Meta spend stayed ~flat through Lent, yet orders jumped 4× in week 1. The same money buys far more orders then.

Last year's orders vs the budget to plan, × a normal week

1 Stock light: check before every phase

- **Green**: Chocolate and Vanilla Caramel have 6+ normal weeks → run the planned level.
- **Yellow**: 2–6 weeks or a size missing → hold at 1×, push what you have, reorder.
- **Red**: under 2 weeks or a top flavor sold out → retargeting only.

Weeks of stock = units ÷ units sold in a normal week. In a fast, divide by the "last year" multiple on page 2.

2 Every week: scale or cut

- **3× or more** revenue ÷ ad spend → add 20% (max twice a week).
- **2–3×** → hold, swap in fresh ads.
- **Under 2×** two weeks running → cut 20%; check stock, offer, page.

Use WooCommerce revenue. 3× was the 2025 level; set your own line from margin.

3 Always the same setup

~80% to one prospecting campaign, **~20%** to retargeting (cart, visitors, refill). Retargeting never stops, even in Red.

Test new ads off-season, 4–6 at a time; in peaks, run only the winners.

Landing pages

99% of ad visitors are on a phone, and 63% leave after one page

1. **Posni protein** · pack photo · price per kg · free delivery · [Dodaj u korpu]
2. **Pick flavor + pack** · in-stock only · 2× Combo with saving
3. **Why it's posni** · yeast protein · 9 amino acids · no added sugar
4. **3 posni breakfasts** · oats, smoothie, pancakes
5. **Real reviews** · photos + names
6. **FAQ** · delivery 2–3 days · card −5% · 14-day returns · how long a pack lasts

BLOCK	WHY IT'S THERE
1 First screen sells	Most ad visitors see one phone screen and leave, so the promise, price and buy button must be on it.
2 In stock + Combo	Combos were 40–66% of revenue at their peak. A sold-out flavor is a paid click with nothing to buy.
3 Posni facts	The fast is why people buy (4× orders in Lent week 1). Facts only, no health claims.
4 Recipes	Answers "how do I use it while fasting", which none of the current pages do.
5 Reviews	Every product page shows 0 reviews today, next to "10.000 zadovoljnih kupaca".
6 FAQ	Removes the last doubts: delivery time, payment, returns.

AD	GOES TO	WHY
Posni / season	/posni-protein	Same reason to buy as the ad
One flavor	Product page, flavor pre-selected	One tap less, same promise
Combo / offer	2× Combo page (rebuild, now 404)	Best revenue per visit: 94–114 RSD
Never	Homepage · 3× packs · sold-out	Homepage earns 54 RSD; 3× packs 0.6% buy

The ads and offers

numbers = calendar phases on page 2 · show only in-stock flavors · facts, no health claims

Posni breakfast Reel
15–20s, hands only: oats, smoothie or pancakes with Yea in 2 minutes. Text on screen, ends on pack + price per kg.
Phases 1 · 4 · 7

"A fasting day" creator video
A creator's real morning in the fast, shaker in hand. Runs as a partnership ad from their profile.
Phases 1 · 4 · 7 · 8

Flavor carousel
One card per in-stock flavor: pack cut-out + one taste line. Last card is the 2× Combo.
Phases 2 · 3 · 5

Combo value static
Two packs side by side, price per kg vs a single, "dovoljno za ceo post".
Phases 1 · 2 · 4 · 6 · 7

"Back in stock" static
The restocked flavor big, "Vratio se omiljeni ukus", price per kg. Run for 2–3 weeks after a restock.
Phase 1, and after any restock

Countdown stories
"Još 7 dana do posta" or "BF još 2 dana". 3 frames: date, Combo, buy button.
Phases 2 · 3 · 6

Offer static
Only for Black Friday: the code, the price, the end date. Nothing else on it.
Phase 3

Refill ad (retargeting)
"Tvoj [ukus] je pri kraju?" to buyers 2 weeks (500g) or 4 weeks (1kg) after the order, with their flavor.
Always on

2× Combo = the default
Cheaper per kg than two singles, and covers a whole fast. Lead with it in every season.

3× pack = upsell only
Show it on the page, never as the ad's offer: 0.6% of its visitors bought.

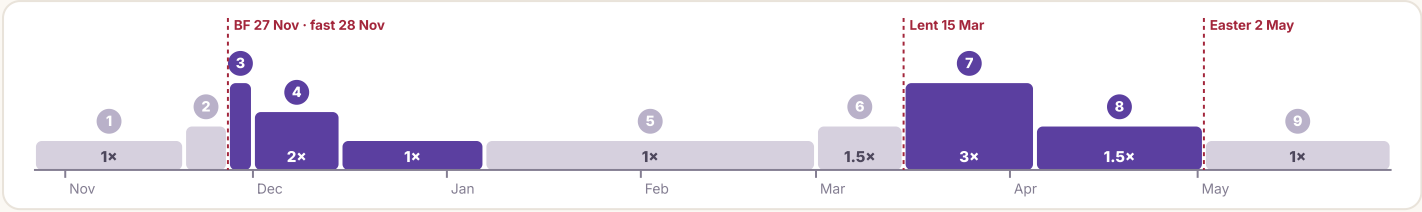

Codes = Black Friday only
Plus one Lent bundle with client OK. Off-season discounts teach people to wait.

Always in the ad
Free delivery, card −5%, delivery in 2–3 days. Leftover Sour Cherry goes out as a mixed 2×500g.

By 20 Nov, have ~12 normal weeks of stock for Black Friday + Božićni post, most of it Chocolate and Vanilla Caramel.

By 1 Mar, have ~18 normal weeks of stock for the build-up and all of Lent. Order in January.

ALWAYS ON
One prospecting campaign (Advantage+ Sales, broad Serbia) + one retargeting campaign. Add ads; don't relaunch.

RETARGETING
~20% of budget: cart, visitors, refill (500g after ~2 weeks, 1kg after ~4).

GOOGLE SEARCH
Brand all year. Add "posni protein" and "veganski protein" in fasts and their build-up.

STOCK LIGHT WINS
Red overrides this calendar: retargeting only until restocked.

Orthodox calendar: Božićni post 28 Nov – 6 Jan, Lent 15 Mar – 1 May 2027 (Easter 2 May). Offers marked "needs client OK" change prices.
